*A New Innovation by Sujeet*

[illegible]

1. For inventory control it's a excel based easy dashboard

Here we use to record all materias details

For use of it more important things is that all materials are coded

To use delet all editable cells

2. On addition table add the materials details then refresh the data

On purchase and sales table only give the item code,date(MM/DD/YY), amount and other cells are automatically taken the values

After all entrys are completed refresh the data to show the balance figure

You can add and auto calculate is possible upto Row no-150 or upto end of row gride line

3. For Refresh Data

Go to Data Tab and click on Refresh All icon.

4. For further develop to it or according to your requirment

you can contact me on my Mob-8270652523/Email-sujeet.bal20@gmail.com
